Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Patent Cooperation Treaty Update

Accession by Albania

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that Albania deposited its instrument of accession to the Patent Cooperation Treaty (PCT) on July 4, 1995. Albania will become the 80th Contracting State of the PCT on October 4, 1995. Consequently, nationals and residents of Albania are

entitled to file international applications under the PCT on and after October 4, 1995, and from the same date it is possible to file international applications designating and electing Albania (country code: AL).

Accession by Lesotho

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that Lesotho deposited its instrument of accession to the Patent Cooperation Treaty (PCT) on July 21, 1995. Lesotho will become the 81st Contracting State of the PCT on October 21, 1995. Consequently, nationals and residents of Lesotho are entitled to file international applications under the PCT on and after October 21, 1995, and from the same date it is possible to file international applications designating and electing Lesotho (country code: LS).

Since Lesotho is a member State of the Harare Protocol within the framework of the African Regional Industrial Property Organization (ARIPO), Lesotho will be able to be designated for a patent granted by ARIPO. Any designation in an international application for an ARIPO patent will, as from October 21, 1995, automatically include the designation of Lesotho for that purpose.

Relief in Certain Extraordinary Situations

This notice addresses the extraordinary situation in which a Patent and Trademark Office (PTO) customer has been intentionally deceived by his or her representative, resulting in a potential loss of intellectual property rights. In such a situation, the PTO will mitigate any such potential loss, to the extent possible within the PTO's statutory framework and the bounds of controlling law.

To mitigate any such loss, the Commissioner of Patents and Trademarks may suspend or waive certain regulations. When that is the case, the Commissioner will exercise his power to do so under 37 C.F.R. §§ 1.183 and 2.148 ("In an extraordinary situation, when justice requires," the Commissioner has the power to *sua sponte* suspend or waive any requirement of the regulations which is not required by statute.).

In advance of the occurrence of such an extraordinary situation, the Commissioner cannot determine what specific action justice will require. Such action, however, could include waiving of certain non-statutory fees, reviving an abandoned application, or granting an application filing date based on the PTO filing date of a copending document that has all the elements of a patent application required by law.

Customer Satisfaction Data Collected To Date

In order to measure customer satisfaction of Patent and Trademark customers, a survey was conducted with the assistance of the U.S. Census Bureau. The survey included a series of questions on the importance to the customer and their level of satisfaction with the decision-making process, timeliness, staff responsiveness, application process, price, outcome of the process and competence of the staff.

The survey results showed on a scale of 1-5, with five being very satisfied — the overall mean score rating for customer satisfaction for Patent customers was 3.3 and 3.5 for Trademark customers. The overall percentage of satisfied Patent customers was 50.9% and 63.5% for Trademark customers. The following is a summary of each question on customer satisfaction and importance:

Item (Question)	Mean Score (Satisfaction)		Mean Score (Importance)	
	Patents	Trademarks	Patents	Trademarks
Decision-Making Process (Overall)	3.1	3.3	4.1	3.9

Price	2.6	3.1	3.4	3.2
Outcome of the Process	3.4	3.6	4.3	4.3
Competence of Staff	3.3	3.6	4.3	4.1

In the area of "red tape," Patent customers rated a mean of 2.6 for the amount of bureaucracy they encountered and a 2.3 for Trademark customers. These scores were on a scale of 1-5 with higher scores representing more red tape encountered.

A second part of the survey contained questions relating to the importance and satisfaction of each of the customer service standards that were set by the PTO in 1994. The standards were based on data obtained at customer focus sessions. These sessions were conducted to ensure that the PTO truly understood the needs and expectations of their customers regarding products and services. A total of 11 Patent and 7 Trademark focus sessions were conducted in 1994. From the data captured at the sessions, the PTO established customer service standards. The following chart contains survey results on customer satisfaction regarding established service standards:

Improvement Efforts

The PTO is making efforts to improve customer satisfaction, including the following:

— Initiated Business Process Reengineering effort to evaluate the entire patent process, including performance measures and award system. The effort comprises of 5 main areas: process, customers, culture, quality, and tools. As-Is analysis completed in mid-July, in process of developing the To-Be models. Held customer focus sessions in various cities to obtain input on the design of the future patent process.

— Initiated Business Process Reengineering effort to evaluate the entire trademark process. Customer focus sessions will be held during the month of August in various cities to obtain input on the design of the future trademark process.

— Installed more fax machines so customers could send documents quicker and more directly to examiners.

— Developed PTO-wide policies and programs to improve lines of communications with the customer (e.g., policy to include the name and telephone number of the PTO employee responsible for an action on all outgoing correspondence and a policy on a standard message to greet customers). Aggressively installed voice messaging throughout the PTO (with a tentative completion date of September 1995).

— Restructured Trademark Law Offices to enhance the examination process.

— Providing legal orientation and customer service training to employees.

— Performing benchmarking with other organizations to develop product and process improvements.

— Held public hearings which resulted in the publication of new rules, MPEP revisions, and establishment of examiner guidelines (e.g., biotechnology, software).

Continuing Efforts

The PTO will continue to survey customers on an annual basis to obtain satisfaction levels on general items contained in this report and on customer service standards. Customer service standards will be added and revised as needed.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.
